

LARYVOX[®] Base plates

Severn Healthcare Technologies are proud to introduce new solutions for Laryngectomy care from Fahl.

Base plates are an attachment system for daily use of Heat and Moisture Exchange (HME) filter cassettes or Hands-Free Valve Systems. The self-adhesive base plates are selected according to the anatomical shape of the tracheostoma and the skin type in order to achieve an optimal attachment. The central housing enables the user to easily place and remove their choice of HME cassette.

To complement the well established and popular Blom-Singer Truseal Contour range of base plates, Severn Healthcare are delighted to introduce the new Fahl range. Fahl offer base plates in a range of shapes and sizes, made from different materials and offering different adhesive strengths.

Pack Size for all base plates: box of 15 base plates, individually wrapped.
Non sterile.

LARYVOX[®] Tape Hydrosoft

The Hydrosoft baseplate is made of a soft, hydrocolloid material and incorporates a very mild adhesive.

- Particularly skin-friendly
- Comfortable on application
- Ability to enclose fluids/secretions, ideal for post-operative application
- Not suitable for use in combination with shower guard!
- Available in three sizes:
Round (Ref: 48130), Oval (Ref: 48230) and XL Oval (Ref: 48330)
- Tinted colouring

LARYVOX® Base plates

LARYVOX® Tape Hypoallergen

A unique comfortable and flexible base plate. Designed for patients with skin sensitivities or skin reactions but also offers a strong adhesion.

- Designed for patients with sensitive skin, prone to skin reactions
- Particularly skin-friendly
- Excellent adhesion
- Adapts comfortably to movements of the head and neck
- Available in three sizes:
Round (ref: 48050), Oval (ref: 48150) and XL Oval (ref: 48250)

LARYVOX® Tape Comfort

A comfortable, tinted base plate which adapts well to the contours of the skin. With the strongest level of adhesion it makes an ideal choice for patients experiencing issues with base plate retention or who wish to trial a hands-free system e.g. the Blom-Singer ATSV II.

- Highest possible adhesive properties
- Adapts comfortably to movement
- High flexibility and long lasting adhesion
- Optimal for physical activity
- Available in three sizes:
Round (48140), Oval (48240) and XL Oval (48340)

LARYVOX® Tape Extra Fine

A unique transparent, strong, waterproof base plate that provides long lasting adhesion. The ultra thin, transparent material adapts well to all tracheostomal conditions, making it an ideal choice for those patients with an irregular or recessed stoma.

- Very strong adhesive properties
- Transparent and extremely thin base plate
- Water-repellent material
- Covers a large skin area
- Adapts optimally to movement
- Discreet appearance
- Available in one size: Rectangular (ref: 48400)

LARYVOX[®] Stoma Protection

LARYNGOFIX[®]

An elegant and functional filter for laryngectomised patients. LARYNGOFIX[®] assures the filtering, humidification and warming of the inspired air and is attached to the skin above the tracheostoma, using adhesive strips.

The rounded shape enables an excellent fit to the tracheostoma, providing good stomal coverage and filtration of airborne particles.

LARYNGOFIX[®] is for single use only and should be changed at least once a day. Available in two colours and sizes:

Pack size for all LARYNGOFIX[®] products: box of 10, individually wrapped.

- LARYNGOFIX[®] skin-coloured, small, 4 x 5.5cm (Ref 45900) - 10 pack
- LARYNGOFIX[®] skin-coloured, large, 4.8 x 6.7cm (Ref 45950) - 10 pack
- LARYNGOFIX[®] white, small, 4 x 5.5cm (Ref 45905) - 10 pack
- LARYNGOFIX[®] white, large, 4.8 x 6.7cm (Ref 45955) - 10 pack

LARYNGOFIX[®] PLUS Stoma Protection

Offers an elegant and functional filter for laryngectomised patients. The skin-friendly medical adhesive strip enables daily use,

LARYNGOFIX[®] PLUS is attached via upper and lower adhesive strips, ensuring particularly stable fixation over the tracheostoma, however the lower adhesive strip can still easily be loosened in order to allow for access to the tracheostoma.

The rounded shape enables an excellent fit to the tracheostoma, providing good stomal coverage and filtration of airborne particles.

LARYNGOFIX[®] PLUS protectors are single use only and should be changed at least once a day.

Available in one colour and two sizes:

Pack Size for all LARYNGOFIX[®] PLUS products: box of 10, individually wrapped.

- LARYNGOFIX[®] PLUS skin-coloured, small, 4 x 5.5cm (Ref 45902)
- LARYNGOFIX[®] PLUS skin-coloured, large, 4.8 x 6.7cm (Ref 45952)

Severn Healthcare base plate options

A quick reference guide to determine the right baseplate for your patient's individual needs.
